Realization of a decarbonized society

Measures to address labor shortages

As a general electronics manufacturer, we leverage our efforts and knowledge in order to provide solutions to "realize a decarbonized society" and "address labor shortages."

Energy-saving Initiatives of Mitsubishi Electric

1 Introduction of high efficiency equipment

Cast resin transformers for power distribution
EX-α series

3-phase motors
S-FPR

IPM motors
MM-EFS

Inverters
REQROL A800

2 Construction of an energy management system

Visualization of all types of information through general-purpose programmable controller and network connection to facilitate simple analysis and improvement

Building equipment

- HMI
- Air conditioning units
- Local ventilation
- Environment sensors
- Heat source/fresh-air treatment unit
- Energy measurement

Overall programmable controller

Production equipment

3 Improved productivity through FA-IT collaboration

Collects and analyzes the operating condition of each piece of equipment. Reduces set-up changeover time and improves productivity and operating ratio

a) Collected data (pre-improvement)

- Set-up changeover
- Set-up changeover

b) Collected data (post-improvement)

- Reduced set-up changeover time
- Improved operating ratio
- Improved yield

4 Collaborative control between building equipment and production equipment

Optimal operation of building equipment (local ventilation) to suit production equipment operation

Exhaust fan Variable speed

Pressure control

Multi-step control

Exhaust damper Automatic opening/closing

Local ventilation

Programmable controller

Fresh-air treatment unit start/stop Automatic

Cooling

External air

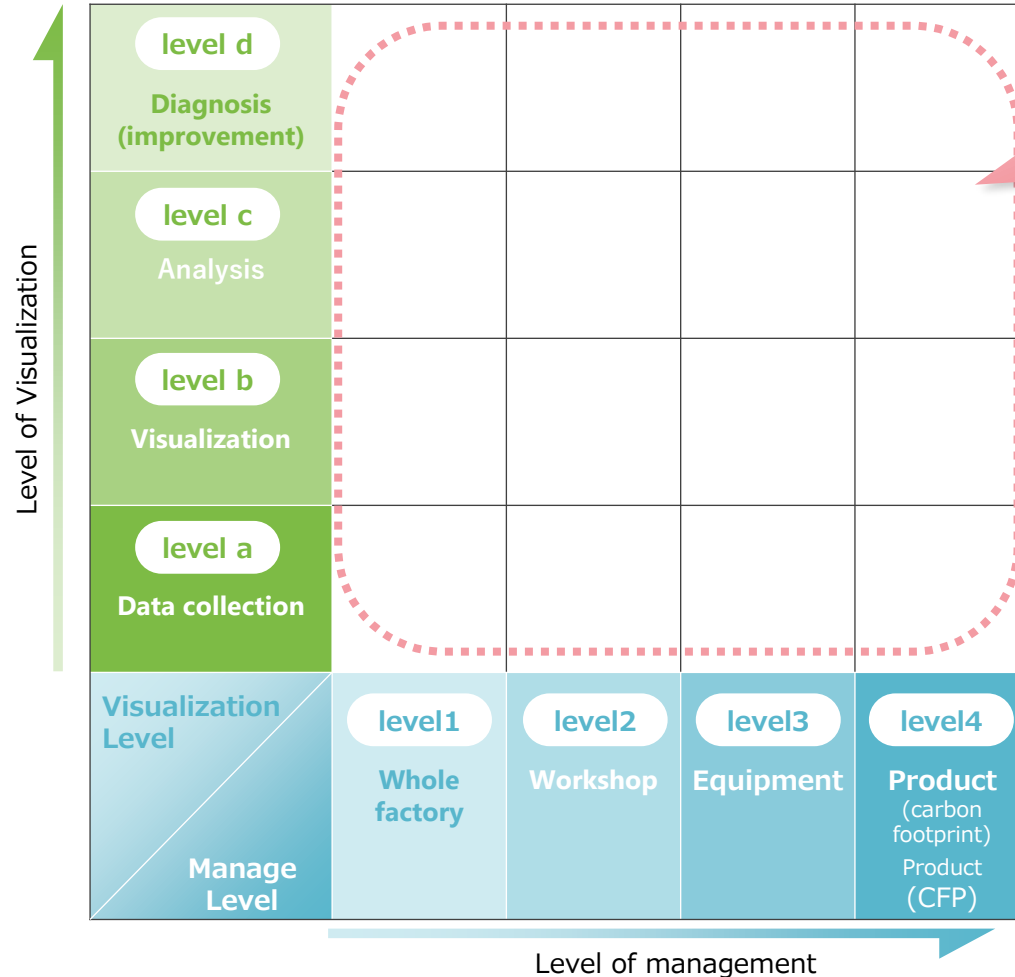

Operating signal

生産設備

外調機

SMKL carbon neutral

As a way to evaluate the current level and improve to the next step **SMKL (Smart Manufacturing Kaizen Level)** suggest.

SMKL stands for carbon neutralization, represented by 16 squares. It is one of the evaluation indicators (rulers).

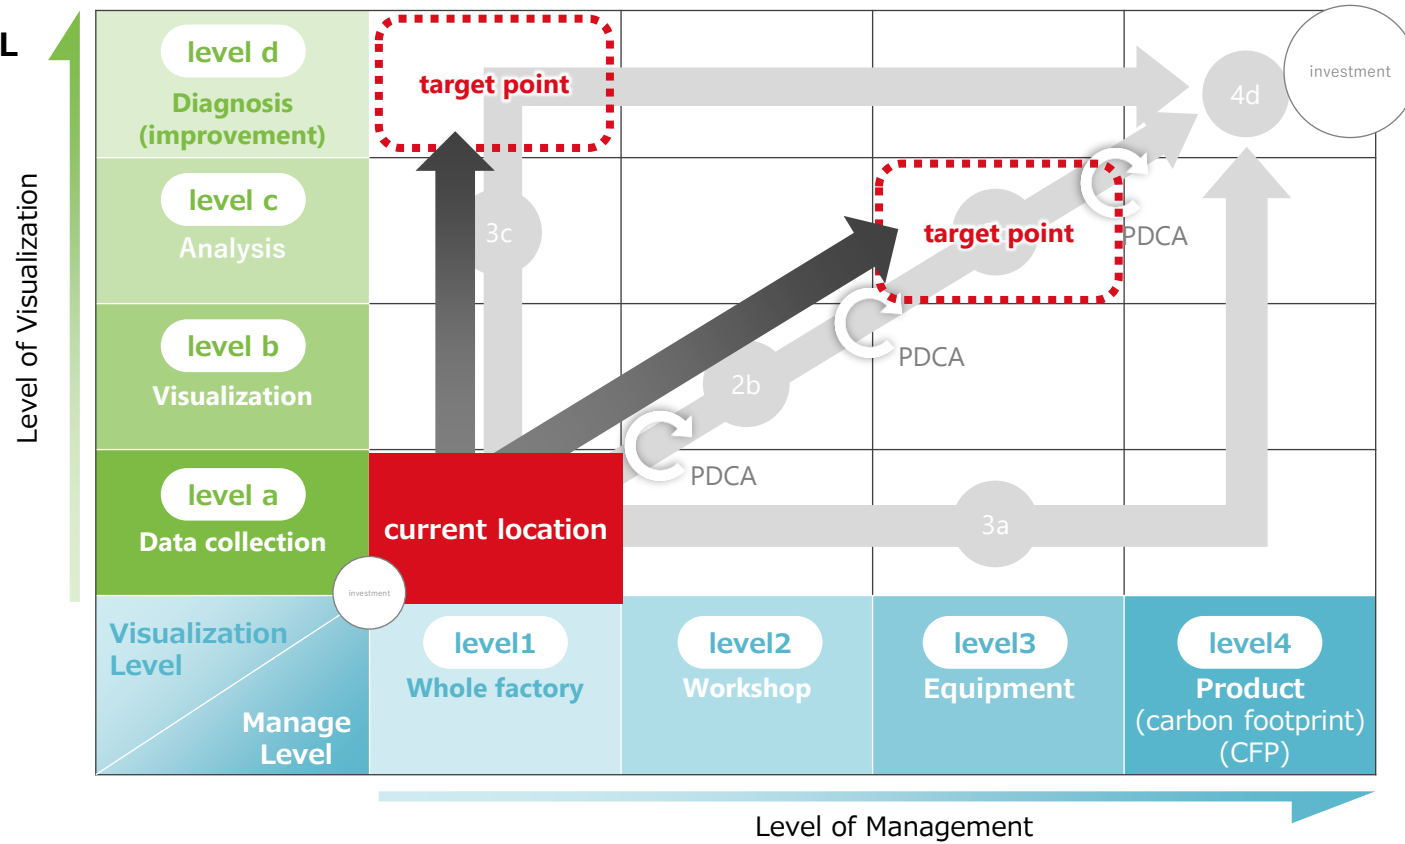

● **What SMKL can do**

- ① Carbon neutrality evaluation indicators can be created for each facility, line, factory, and supply chain.
- ② The current carbon neutralization level can be grasped, and it is useful for continuous improvement activities (Kaizen).
- ③ Planned investment decisions for carbon neutralization of factories can be made between management and equipment managers.

How to use SMKL

You can evaluate your current location and understand to what level carbon neutralization has been achieved. You can also use it as a roadmap for capital investment because you can see what kind of equipment will be introduced and how much investment is required.

● Features of SMKL

• By organizing your company's current position and setting a target point, you can consider capital investment for each step toward your goal.

Collaborate with AMEICC, AOTS and EEC to develop "GX Training" course for manufacturing

System Analyst 7
หลักสูตรเข้มข้น ใช้งานได้จริง

ฝึกอบรมนักวิเคราะห์และพัฒนาระบบอัตโนมัติและหุ่นยนต์
ภายใต้ความร่วมมือของหน่วยงาน CoRE

เป็นประกันค่าฝึกอบรม 20,000 บาท

TOPIC	DATE
Business Analysis and Productivity Improvement	7-8 Mar
Process Analysis and OT Technology Design	14-15 Mar
Site Visit (OJT) day 1 (random 1 day)	20-22 Mar
OT Model Design and Low Cost Automation	28-29 Mar
Automation Simulation and Simplify	3-5 Apr
IT System and Data Management Design	25-26 Apr
Site Visit (OJT) day 2 (random 1 day)	30, 2, 3 May
Finance and Government Incentive	9-10 May
Site Visit (OJT) day 3 (random 1 day)	15-17 May
Sumup and Present Feasibility	23-24 May

คุณสมบัตินักวิเคราะห์
สำเร็จการศึกษาชั้นปริญญาตรีขึ้นไป
บุคลากรทางการศึกษา ได้แก่
อาจารย์วิชาสายเทคนิค/มหาวิทยาลัยสายเทคโนโลยี
ผู้ประกอบการ System Integrator
และภาคการผลิตระดับผู้จัดการขึ้นไป

รับสมัคร

สมัคร : วันที่ 12-21 กุมภาพันธ์ 2567
อบรมระยะสั้นโดยไม่มีใบรับ : วันที่ 23 กุมภาพันธ์ 2567
ใบรับระยะ : วันที่ 26-28 กุมภาพันธ์ 2567
อบรมระยะยาวผู้เข้าอบรม : วันที่ 1 มีนาคม 2567

สมัครด่วน
รับจำนวนจำกัด

แจ้งผู้สนใจสมัคร
1. โทร 09-099-3111 (ในวันจันทร์-ศุกร์ 10.00-18.00 น.)
2. E-mail: training_ot@eecc.co.th
3. E-mail: training_ot@eecc.co.th
4. Email: training_ot@eecc.co.th

รับสมัครโรงงานภาคการผลิตร่วมเป็น On the Job Training (OJT)

Pain point analysis

- + Energy efficiency info.
- + Renewables info.
- + Decarbonization info.

Propose Solution

- + Energy conservation
- + Technical of energy efficiency

Propose Feasibility

- + Carbon Credit, Net zero
- + CFP calculation

Project Presentation

- + Automation concepts with decarbonization

Measures to address labor shortages

Helping to solve the issue of labor shortages by utilizing automation and AI technology

To address issues such as a declining labor force and skill transfer, we support labor-saving and quality stabilization by providing robots, sensors, and AI technology.
