

VENTILATION IS A KEY TO PROVIDE A BETTER IAQ

Increase ventilation can REDUCE pollution concentration but consume MORE energy

A study in high humidity environment (Phuket)

IAQ STAR

The IAQ Star initiative is designed to encourage business operators to enhance their IAQ management, aiming to improve health and work efficiency within buildings. This campaign also seeks to raise public awareness and

understanding about the importance of good IAQ management. The IAQ Star aims to foster a widespread recognition of the critical role that IAQ plays in promoting adopt practices that ensure cleaner, healthier indoor environments.
